## The End and Beginning

This is says the calcidar August which the Empreor Augustus renamed for alm self when he reference the extendus he cause it was a month which hid fron bind to him. It had seen him admitted to the consulate and receive the attentiones of the soldlers stationed on the Juniculum Thrice had he criebrated Litumphs during the month he had concluded the civil and subdurd E5311. Augustus 1 ad rigson to be fond of August.

Augustus and Rema went to pleies but August didn't. It has survive' to make the following claims to distinction

It is it e month before school hegins be fore the football scason begins before cool weather begins before the really fervent oralors of the presidential campaign be gins and before the summer vacation sea son and the straw hat season ends

August unless Suptember happens to businessed brings up the rear of the sum mer mande. Ordinarilly II is a month in which nothing much happens or is sup posed to happen. It contains no boilday and no turning point which is by way of being a fair reason for ranking it among the more desirable months

## Wiring the Governor

What the governor of North Carolina said to the governor of South Carolina temporarily is less important than what almost any governor these days is likely to say about the governor of kansas

Governors it is plain don't waste any time leving each aller. There is a good resean for this. They are jentone. When ever a man reaches the governorship he is bound to start dreaming about going a little further. Consequently governors are looking out for themselves

At a lime like the present with Domo eralic governous olmost as common as Democratic sanators from the solid south, the competition among them is prefly florce. On the other hand there is the governor of Kansas who thanks to the fact he is a Remblican is no competition at all The new deal project of the Democratic

governors therefore is to see which one can say the monnest things about their Kansas bruther The one who slings the most mud will get a nice prize to be selected later

They are all going to wire the governor of hancon if they can—not tolegraphically but strategically. If they don't a lot of them will lose their jobs in the near fu ture and none of them will have a chance to got that prize which might turn out to se a presidential nomination along about 1910 or 3911

## The Boys Make Good

The civilian conservation corps boys ap parently are making good. During the month of June 13 000 of them left the curps to accept employment in private industry according to Robert Fuhner CCC director This compares with an average of 12000  $\pi$ month during the fiscal year ended June 40

What is more evidence abounds to prove that must employers are glad to hire these well trained lads. ## Landon's Pledge To Labor Important

Makes Clear His Belief in Rights of Collective Bargaining and Lawful Use of Organizers

Lardon in his letter to Norman Thomas makes it clear that he did not mean to exclude union organizers. In which union controversy in which violence occurs it is not infrequent that persons who are not connected with the employee engage in various activities that mount to coercion or inlimidation Governor I it don now apparently wishes it to be inderstord that he did not think three should be coercion by anybody when the rights of workingmen to work and to choose ingressentatives are bring assected. But more important than any clarification of his original salament as to what he meant by coercion is the aftirmative comment cow given that the Republican monince pickes himself to the doctring that all workers have a right of self or ganization and have the right by lawful and proper means to send their organizers into underganized industry.

The incident is illustrative of a trait in

and proper means to send their organizers into an unorganized industry. The incident is illustrative of a trait in Covernor Landon's character which is housed to attract more attention as the ampaign progresses. Time and again in the jast the Social'st conflicte or some other opponent would addiess an open letter to a Republican or Democratic nominer only to have such a letter ignored. Covernor Indoor is not likely to engage in any wide sprend correspondence with persons who write him open letters but when as in the case of the communication from Norman Thomas a courteous request for amplification of view in received if apparently is going to be Wr Landon's program to give a full and fruik answer. There are many persons who disagree with the political and economic philosophy of Norman Thomas but in all the years be has been in the public eye he has not been guilty of hitting below the helt in any camping. His letter of inquiry about Mr Innion labor views was in line with the doubts expressed by many people who did not happen to be suspetitizers with the Norman Thomas doctaines.

It was Jue day Jug 1 1916

Lardon in hits letter to Norman Thomas
makes it clear that he did not mean to

In mery union controversy in which vio-

The labor issue is one of the most imperium taised in a generation. The efforts of John I Laws to obtain control over labor unions generally through his industrial union campaign has stirred up stello of a different kind than its usually to he observed in a political campaign. Thus the skilled workers are today pitted against the unskilled workers are today pitted against the unskilled worker if the Lowis type of industrial union prevails the skilled workers are assessed to the nonlinear agreement to the political power of the numerically senter number of unskilled workers in a given industrial union. President Rossavell's espousal of the lewis side of the controlers, has made many laboring men hostile to the reelection of Mr. Roosevel for fear it would mean a complete conquest by Mr. Lowis but the laboring men of the skilled crafts on the other head have wanted to be sure that in Governor Landon's feeted President they had a true friend and not a tool of employer interests. That's why Governor Landon's frank avown of the rights of union organizers represents a mitostone in the kabor controlers of the hour and fends to improve the Republican nomines apportunities to get a larger than of the labor vote than might have been the case had le left undefined the phrase which it appears was unintentionally ambiguous in his accoptance speech

Those who must support him for party regularity reasons but who have been hoping he would be more conservative if restected—the group following Sonators Glass Byrd Tydings and Adams—were distressed And the radical frings was delighted. The thought of comparing the new deal fight against capital—against investments it you please—to the fight of the colonists against British royal domination—came to the President almost at the least moment. He did not prepare his speech much in advance, and it is pretty nearly an accident that he took this particular tack. It all give out of the fuss and turore that was kicked up whom announcement was made a little more than a mouth ago. Has the President would make his trip to Texas and other states at a time when the Republican national convention would be in progress. It was charged he was fring to stead that convention's publicity to deprive it of its normal share of front page new spaper display not to mantion radio broadcasting and newspaper picture sections. So he announced that on that trip he would make historical taiks going into the history of the sections he visited.

He not only did but faund some very adroit ways of working good political siguments into them In fact he was so successful that when he came to write the Philadelphia speech his mind naturally grooved itself in a historical channel. Whereupon the Fourth of July Independence hall Litherty Beil theme song was conceived. But the conservative Democrats were very unhappy as a result for once embracing that theme the President went a great deal further by Interence than he has ever zone before In fact he approved language which might have been disquieting to the supreme courl in his TvA decision For in stead of talking about incidental power the President had the platform boast about the vard stick which would force electricrates down and make electric current cheaper to all consumers.

Naturally the related fringe was highly pleased. They had been somewhat disturbed at the soft going of their leaders at Philade phins the complete blackout of
